

Jessica Beach is a professional engineer in the State of Florida with 18 years of experience in the field of environmental engineering, with a focus on stormwater. Ms. Beach has a Bachelor of Science in environmental engineering and master's in engineering in environmental engineering from the University of Florida. After graduating from the University of Florida, Ms. Beach joined the St. Johns River Water Management

District, in the District's Regulatory Program. She also spent some time as a project manager in the District's Division of Projects before joining the City of St. Augustine.

Ms. Beach joined the City of St. Augustine's Public Works Department in 2017, where she served as the City's Stormwater Engineer, overseeing the City's Stormwater Program. In 2021, she was appointed as the City's Chief Resilience Officer. In this current role, Ms. Beach established the City's Resilience Program which includes policy, planning, programs, projects, and funding to continue the City's aggressive approach in planning and adapting to the current and future coastal vulnerabilities and challenges.
